Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to reducing power consumption in standby mode, classified in class 365, subclass 229.
 - II. Claims 19-20, drawn to particular word line driver circuit, classified in class 365, subclass 230.06.
 - III. Claims 21-22, drawn to particular word line driver circuit, classified in class 365, subclass 230.06.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II/III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as it does not required the circuit claimed in II/III. See MPEP § 806.05(d).
3. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has different circuit configuration (see FIG. 1a) than that of invention III (see FIG. 3). See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and field of search, restriction for examination purposes as indicated is proper.

Art Unit: 2824

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to VanThu Nguyen whose telephone number is (571) 272-1881.
